

## POFIX XPS

### Description

#### POFIX XPS

1. POFIX XPS është një material izolues termik i bërë nga polistireni i zgjeruar (XPS) me një strukturë të qelbër të përbërë nga bula të vogla të gazit të mbytur.

2. Kjo strukturë e qelbër krijon një pengesë të fortë për kalimin e nxehtësisë, duke ofruar një performancë të lartë izoluese.

3. POFIX XPS është i lehtë, i fortë dhe i qëndrueshëm ndaj faktorëve të ndryshëm të mjedisit, duke përfshirë lagështinë dhe ndryshimet e temperaturës.

4. Materiali është i përshtatshëm për aplikime të shumta, siç janë izolimi i mureve, tarrave dhe tavanit, si dhe në aplikime të veçanta të inxhinjerisë.

5. POFIX XPS ofron një zgjidhje të sigurt dhe të besueshme për izolimin termik të ndërtimit tuaj, duke ndihmuar në reduktimin e konsumit të energjisë dhe në rritjen e komoditetit të brendshëm.
