

STIROKOL

Description

POFIX STIROKOL Standard White, 25kg

Stirokol 3... is a high-strength adhesive for bonding tiles and stones. It is suitable for use on various substrates and provides excellent adhesion and durability. The product is white and easy to apply. It is recommended for use in areas with high traffic and moisture.

Application instructions: Apply a layer of 2-3mm to the substrate and press the tile into it.

For tiles up to 150x150mm, use 1.5kg/m². For larger tiles, use 2kg/m². For stones, use 3kg/m².

For tiles up to 150x150mm, use 24h curing time. For larger tiles, use 48h curing time.
