

POCOLOR PRIMER

Description

POCOLOR PRIMER

is acrylic resin for interior and exterior use. It can be used for covering the surfaces before the paint is applied. With Pocolor Primer the ability of the surface to absorb is reduced, strengthens the surface makes it smooth and the final paint results better. For excellent results, the reciprocity of dissolution with water is 1:2, but it is tolerated to 1:5.

Preparation and application

Time for application after mixing with water

Drying time of material

Application thickness

Granulation

Consumption

The temperature of the air and surface
