

POFIKOL 15***

Description

Â Tile adhesive

Pofikol*15** is a thin layer adhesive on the basis of cement and complements.Â It is used for sticking ceramic tiles on walls and floors and arranging internal and external spaces.

The new formulation of Pofikol*** with cellulose fiber preserves the surface from cracking and makes it stronger and more resistant to temperatures.

Preparation and application

Parameters

Time for
application
after mixing
with water

60 min.

Drying time
of material

24 h.

**Preparation
and Parameters
application**

Application thickness	3 - 5 mm.
Granulation	0.7 mm.
Consumption	4- 5 kg/m2.
The temperature of the air and surface	+5/+35Â°C
Color	
Kg bag	25
Bags/pallet	48
