

## POFIKOL 15\*\*\*

### Description

#### Â Tile adhesive

**Pofikol\*\*\*15** is a thin layer adhesive on the basis of cement and complements.Â It is used for sticking ceramic tiles on walls and floors and arranging internal and external spaces.

The new formulation of Pofikol\*\*\* with cellulose fiber preserves the surface from cracking and makes it stronger and more resistant to temperatures.

### Preparation and application

#### Parameters

Time for application after mixing with water 60 min.

Drying time of material 24 h.

**Preparation  
and Parameters  
application**

Application thickness	3 - 5 mm.
Granulation	0.7 mm.
Consumption	4- 5 kg/m2.
The temperature of the air and surface	+5/+35Â°C
Color	
Kg bag	25
Bags/pallet	48
