

## POFIX-10

### Description

#### Mortar with a cement base

**Pofix 10** is a mortar with cement, lime, and an additive base for machine and hand application. It is used as a base mortar for final mortars with mineral content, structural mortars, and lubricating mortars. It is applied to outside and inside walls of brick, concrete, styrofoam, concrete elements in damp rooms, rough concrete surfaces, ceilings, facades, etc. The use of Stirokolit or Poflex is essential on smooth concrete surfaces.
