

## POFIX 322

### Description

#### Glazing

**Pofix 322** is fabricated material-glazing(finish glaze)on the basis of cement and lime for internal and external walls. It is used for glazing of basic mortars (Pofix 10, Pofix 090, etc), delicate mortars concrete surfaces, and less wet places.

When it is completely dry it can be colored over or covered by wall papers.

#### Preparation

#### and Parameters

Time for application after mixing with water	20 min.
Drying time of material	18 h.
Application thickness	1.5 mm.
Granulation	0.6 mm.
Consumption	1.5 kg/m2.

**Preparation  
and Parameters  
application**

The  
temperature  
of the air  
and surface

+5/+35Â°C

Color

Kg bag 20

Bags/pallet 60
