

POFIX SIPOREX

Description

Adhesive for gas-concrete bricks (siporex)

Siporex is adhesive on the basis of cement, additives, and specially selected aggregates. While mixing with water we get a compound, which has the excellent capability for adhesion and flattening gas-concrete bricks (siporex). The surface must be clean and must satisfy building standards. It is not recommended to use on surfaces, which are previously prepared with gypsum compounds.

Preparation and application

Time for application after mixing with water

Parameters

60 min.

Drying time of material

24 h.

Application thickness

3 - 5 mm.

Granulation

0.7 mm.

Consumption

4- 5 kg/m².

The temperature of the air and surface

+5/+35°C

Color

Kg bag

30

Bags/pallet

40

Date Created

01.05.2023
