

POFLEX-3

Description

Adhesive for granite, marble, and plates-plates

Poflex 3 is a thin layer adhesive for tiles on the basis of white cement and complements. It is appropriate for sticking on concrete, bricks, light concrete, plaster tiles, etc. It is used for spaces exposed to the sun and low temperatures, and for sticking of all kinds of ceramic tiles, marble, and granite stones. The surface must satisfy construction norms. The new formulation of Poflex 3 with cellulose fiber, preserves the surface from cracking and makes it stronger and more resistant to temperatures.

Preparation and application

Time for application after mixing with water
Drying time of material
Application thickness
Granulation
Consumption
The temperature of the air and surface

Parameters

60 min.
24 h.
3 - 5 mm.
0 - 0.7 mm.
4- 6 kg/m².
+5/+35°C
