

## POFLEX-3

### Description

#### Adhesive for granite, marble, and plates-plates

**Poflex 3** is a thin layer adhesive for tiles on the basis of white cement and complements. It is appropriate for sticking on concrete, bricks, light concrete, plaster tiles, etc. It is used for spaces exposed to the sun and low temperatures, and for sticking of all kinds of ceramic tiles, marble, and granite stones. The surface must satisfy construction norms. The new formulation of Poflex 3 with cellulose fiber, preserves the surface from cracking and makes it stronger and more resistant to temperatures.

#### Preparation and application

Time for application after mixing with water  
Drying time of material  
Application thickness  
Granulation  
Consumption  
The temperature of the air and surface

#### Parameters

60 min.  
24 h.  
3 ÷ 5 mm.  
0 ÷ 0.7 mm.  
4- 6 kg/m<sup>2</sup>.  
+5/+35°C

Color

Kg bag
