

## POTIEFGRUND

### Description

#### Potiefgrund

is acrylic resin for interior and exterior use. It is used to adjust the absorption of moisture on the surface (which may be of brick, concrete, old plaster, etc.) before the application of gypsum-based mortar, cardboard, color, etc. Potiefgrund is ready for use and should not be mixed with water. Before applying, dust and other impurities on the surface must be eliminated.

#### Preparation and application

Time for application after mixing with water

Drying time of material

Application thickness

Granulation

Consumption

The temperature of the air and surface
