

STIROKOL 2

Description

Adhesive for EPS and isolation boards

Stirokol 2 is fabricated thin layer of glue on the basis of cement and complements. Stirokol 2 is used to stick boards over bricks, concrete, old mortar, etc. The base must be strong, smooth, clean of dust, and not frozen. The new formulation of Stirokol 2 with cellulose fiber preserves the surface from cracking and makes it stronger and more resistant to temperatures.

With its new features, Stirokol 2 can be used for the adhesion of stone wool.

Preparation

and application

Parameters

Time for
application
after mixing
with water

60 min.

Drying time
of material

24 h.

Application
thickness

3 – 5 mm.

**Preparation
and Parameters
application**

Granulation 0 – 0.7 mm.

Consumption 4- 6 kg/m².

The
temperature
of the air +5/+35Â°C
and surface

Color

Kg bag 25

Bags/pallet 48

Date Created

01.05.2023
